28 - 31 FORD FIREWALLS & TECH INFO

The Set-Back Information Provided on This Page Is For your Information

These references are to help you decide which firewall kit will best fit your particular application. There are many factors which will affect your choice of kits; engine set-back, radiator core thickness, air conditioning or super chargers. You need to determine the length of the engine package you intend to install & then figure out the distance you have from the back of the radiator core to the stock or existing firewall. To do this you will know how much extra room or set-back you will need. The firewall only fits in one place in the body, but your engine can be moved forward or backward as much as needed to obtain proper clearances. If you have any questions, please call our Customer Service Dept. @ (928) 420-6346.

**281000 28-29 FORD FIREWALL
4" Set-Back**

This is a complete Kit consisting of the upper & lower sections. The lip on the upper section slides over the lip on the lower section, making a very smooth edge.

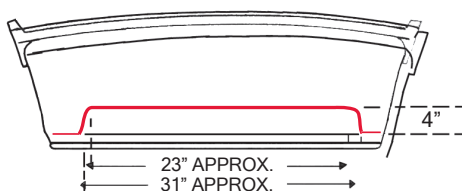

**301000 30-31 FORD FIREWALL
4 1/2" Set-Back**

Need more engine room? This Firewall has a 4 1/2" set-back from the front edge of the cowl. Remember, the stock Firewall protrudes 2", therefore the total set-back is 6 1/2".

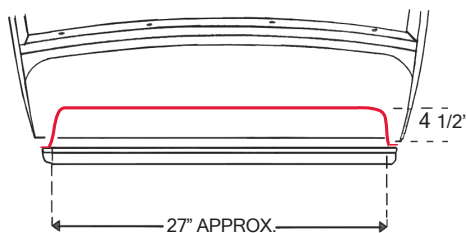

**301005 30-31 FORD FIREWALL
2 1/2" Set-Back**

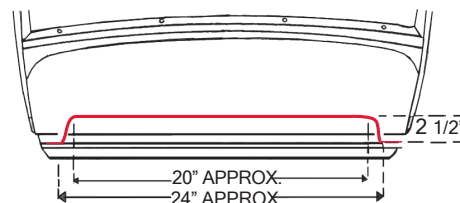

This Firewall has an approximate 2 1/2" set-back from the cowl edge. Add 2 inches for the stock Firewall protrusion & you have a 4 1/2" set-back.

**281000 1928-29 FORD FIREWALL
(4" Set-Back)**

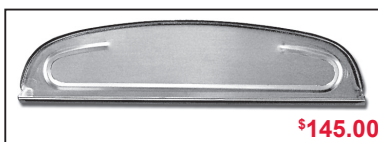

**301000 1930-31 FORD FIREWALL
(4 1/2" Set-Back)**

**301005 1930-31 FORD FIREWALL
(2 1/2" Set-Back)**

ALL SET-BACK MEASUREMENTS ARE TAKEN FROM THE COWL EDGE WITH THE STOCK FIREWALL REMOVED. KEEP IN MIND THE FACE OF THE STOCK FIREWALL PROTRUDES ABOUT 2" IN FRONT OF THE COWL EDGE.

**281003 28-29 FIREWALL UPPER
SECTION**

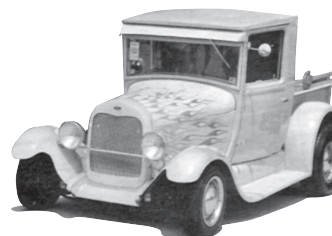

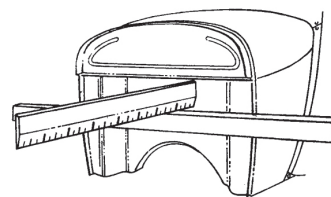

The upper section of the 28-29 Firewall will match up to a stock lower section 281002, to the right.

**281002 28-29 FIREWALL LOWER
SECTION**

The lower section may be used with the stock upper section if you only want to change the bottom.

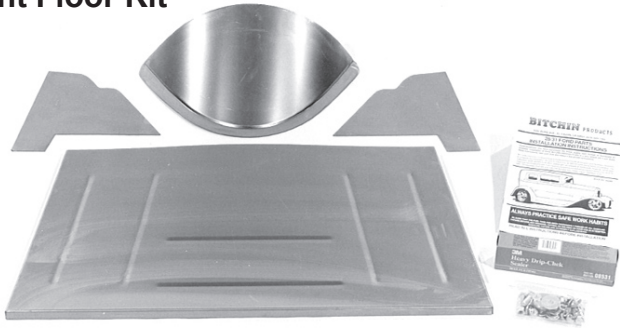

Measure the set-back from the face of the firewall back as illustrated.

NOTE: These firewalls are designed for the most popular engine-transmission conversion which is Chevy engine & GMC turbo transmission. Any other engine installation (Ford, Mopar, etc.) may require rework of the bell housing area of the firewall.

28 - 31 FORD FLOOR KITS

BATTERY BOXES

BATTERY BOXES

Group 42	901020	\$110.00
Group 71	901006	\$110.00
Optima Box	901040	\$110.00

Mounting a battery in a street rod has always created problems, some major and some minor. Our battery box kits will solve most of the problems. The universal mounting brackets supplied with these kits allow you to choose the mounting method which best suits your application, including flush floor mounting, side mounting, or halfway through the floor for extra ground clearance. We offer three kits. The positive battery hold down, adequate ventilation & cable protection give added security to your battery installation.

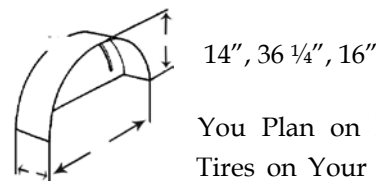

Group 42: 9 3/4 L x 7 W x 7 1/2 H
Group 71: 8 1/2 L x 7 1/4 W x 9 1/4 H
Optima: 10 1/2 L x 7 1/4 W x 8 1/2 H
